The UNIL's School of Biology launches a call for applications to the 2017 Summer Undergraduate Research (SUR) Programme in the biological and medical sciences.

This English-taught 8-week programme (July 3rd to August 25th, 2016) aims at introducing Bachelor-level students to the world of biological and biomedical research: Individual students will be each integrated in a different experimental research laboratory of the School of Biology. This 8th edition of the SUR Programme will host around 15 participants from all over the world, including a couple of local students.

A full scholarship toward tuition costs, living expenses and justified travel costs will be awarded to all selected participants. Application deadline: January 31st, 2017. More information about the programme: https://www.unil.ch/eb-sur/home.html
The SUR Programme hosts about 15 undergraduate students from around the world, studying towards a biology or medicine degree, to pursue an independent lab-based research project. Weekly workshops on presentation skills and career guidance are organised, as well as social activities. At the end of the summer, students present the results of their research on a poster during a symposium and prepare a written report. A scholarship is awarded to all selected participants.
